JAYANTH PEDDI

Full - Stack Developer

PROFESSIONAL SUMMARY

Dynamic Full-Stack Developer with good experience in designing and deploying end-to-end scalable web applications. Experienced in working with frameworks such as Next.js, React.js, and Node.js for responsive frontends and highly optimized backend implementations. Experienced in designing APIs, third-party integrations, and database tuning for increased functionality and performance. Experienced in transforming intricate designs into seamless, intuitive interfaces and mapping technical solutions to business goals for high-quality, effective applications.

EDUCATION

CMR Engineering College, Hyderabad, Telangana
B.Tech, Computer Science and Engineering, 11/2021 to 04/2025

Narayana Junior College, Hyderabad, Telangana
MPC Intermediate, 06/2019 to 04/2021
GPA: Percentage: 86%

SKILLS

Java	Python
React	React Native
Node.js	Mobile Development

WORK HISTORY

BACKEND DEVELOPER 12/2024 to 03/2025
IIIION

- Built high-performing server-side applications using external APIs, MongoDB for robust data operations, and Next.js for streamlined workflows.
- Delivered flexible and engaging digital products with a strong focus on performance and responsiveness.
- Strengthened backend reliability through regular code audits, technical syncs, and continuous improvements.

FULL STACK DEVELOPER 04/2024 to 09/2024
NEXZAP

- Delivered scalable front-to-back solutions by crafting reusable UI components and integrating them smoothly with REST APIs.
- Contributed to project planning and development strategy, ensuring each sprint aligned with the broader product vision.
- Maintained a modular, scalable React architecture supporting long-term product evolution and maintainability.

REACT NATIVE DEVELOPER 10/2023 to 01/2024
MNOCH Urban Edge CRM Pvt Ltd

- Spearheaded the rebuild of a real estate CRM into a robust mobile application, enhancing team collaboration and efficiency.
- Worked closely with cross-functional teams to translate business needs into practical app features.
- Integrated services like Google Maps, push notifications, and real-time sockets to elevate user engagement.

Meta React Native Specialization - Coursera

Full Stack Web Development - Udemy

Data Structures & Algorithms I - edX

Make Your Own App - edX

Machine Learning - Stanford University

PROJECTS

Resume Generator
- Crafted an Adaptive Resume Platform: Designed a mobile-friendly web tool using Flask and Python that helps users create polished resumes quickly.
- Enabled Real-Time Edits: Implemented live preview capabilities so users can instantly see changes as they personalize their content.
- Enhanced Skill Showcasing: Introduced visually engaging skill indicators, making resumes more interactive and easier to evaluate.

Food Ordering App (Little Lemon)
- Streamlined Onboarding Flow: Leveraged React Native to design an intuitive introduction process for new users.
- Refined User Navigation: Structured smooth navigation and interactive profile components to improve the overall app experience.
- Built a Seamless Ordering Journey: Developed a user-centric interface allowing for fast and efficient food selection and checkout.

Attendance Management
- Implemented Face Recognition for Attendance: Developed a smart system using facial recognition to automate and authenticate user check-ins.
- Boosted Operational Productivity: Reduced manual tasks, cutting down errors and saving time for administrative teams.
